Central-Core Multi-Dwelling Unit (MDU) Floor Plan

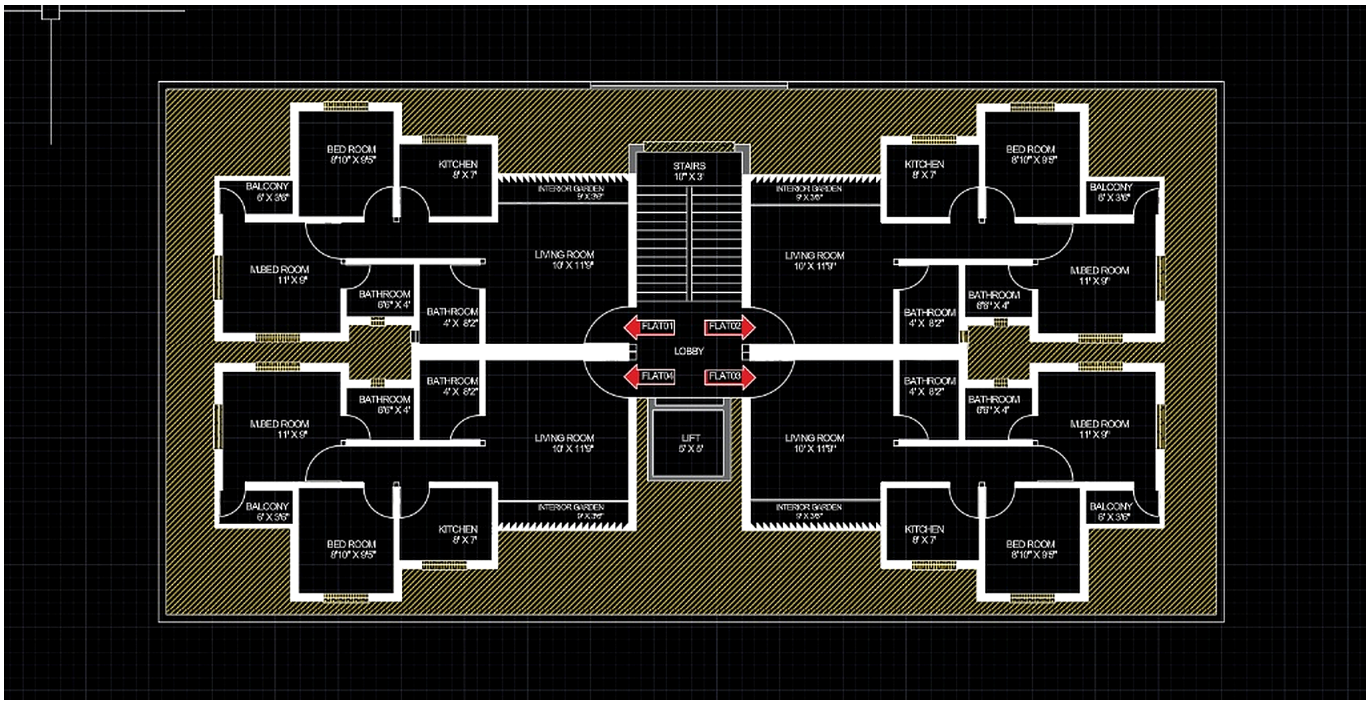

Project Documentation • AutoCAD 2D Residential Planning

Project Overview

Project type: Multi-apartment residential floor plan
Drawing medium: CAD-based 2D architectural floor plan
Scope: Residential planning, 2D drafting, room organization and technical drawing documentation.

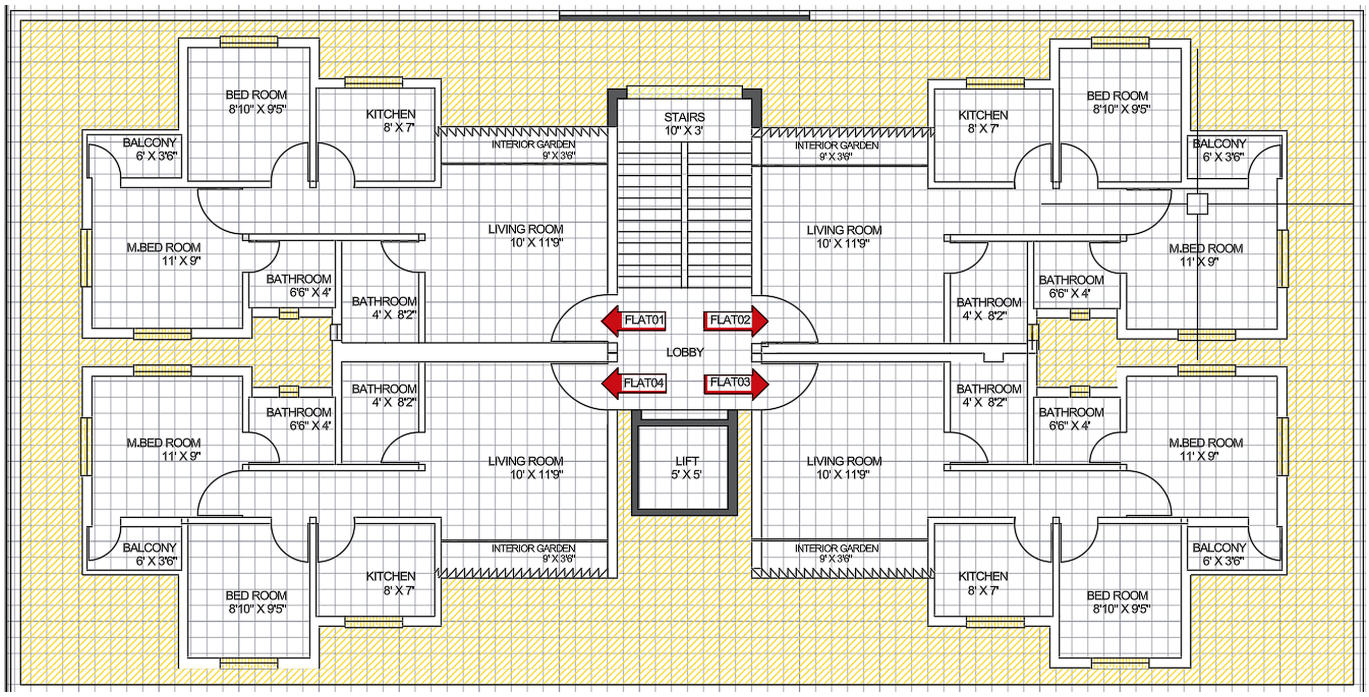

The drawing presents four residential apartment units arranged around a central circulation and service core. The plan includes living rooms, kitchens, bedrooms, bathrooms, balconies, interior garden spaces, a staircase, lift and common lobby.

Drawing Sheet 01

Floor-plan drawing supplied for the project.

Drawing Sheet 02

Detailed floor-plan drawing showing room labels, dimensions and central flat markers.

Spatial Planning

The plan follows a repeated four-unit arrangement around a central shared core. The stair and lift are positioned centrally, with the lobby providing access toward the four apartment units. Living areas face the central zone while bedrooms, kitchens and balconies are distributed toward the outer perimeter.

Planning Components

- Four apartment units identified around the central core.
- Living room, kitchen, bedrooms, bathrooms and balcony spaces within each unit.
- Central staircase, lift and common lobby.
- Interior garden spaces adjacent to the living areas.
- Repeated and symmetrical apartment planning arrangement.

Room & Dimension Schedule

Dimensions below are taken from labels visible in the supplied drawing and should be checked against the original DWG before being used as construction or contractual information.

Element	Visible dimension
Bedroom	8'10" × 9'5"
M. Bed Room	11' × 9'
Kitchen	8' × 7'
Living Room	10' × 11'9"
Bathroom	6'6" × 4'
Bathroom	4' × 8'2"
Balcony	6' × 3'6"
Interior Garden	9' × 3'6"
Stairs	10' × 3'
Lift	5' × 5'

Architectural Elements

Element	Drawing documentation
External walls	Perimeter wall lines define the apartment envelope.
Internal partitions	Room divisions separate living, bedroom, kitchen and bathroom zones.
Doors	Door openings and swing arcs are represented throughout the plan.
Windows / openings	External wall openings are visible around the apartment perimeter.
Balconies	Balcony projections are shown at the outer apartment corners.
Staircase	Central staircase is represented with repeated tread lines.
Lift	Central lift is labelled 5' × 5'.
Lobby	Central lobby distributes access to the four apartment units.
Interior gardens	Interior garden pockets are positioned beside living areas.

Drafting Workflow

01 — Plan interpretation: Identify apartment units, room zoning and the central circulation core.

02 — 2D drafting: Develop walls, partitions, openings and major architectural elements in CAD.

03 — Annotation: Add room names and dimensions for clear technical communication.

04 — Core coordination: Coordinate stair, lift, lobby and apartment access points.

05 — Drawing review: Check geometry, labels, openings, circulation and presentation.

06 — Documentation: Organize the completed drawing as a professional project sheet.

Skills Demonstrated

• AutoCAD 2D floor-plan drafting
• Residential space planning
• Architectural drawing interpretation
• Room and circulation zoning
• CAD annotation and dimensioning
• Repeated-unit planning
• Stair and lift core representation
• Technical drawing presentation
