This is a subtotal only. The kitchen, stair area, wall thicknesses, and any unlabelled circulation or service areas are not included because their dimensions are not provided.

03 | LAYOUT AND FUNCTIONAL ELABORATION

- **Living and circulation:** The 30' × 15' living room / hall forms the main shared space. The stair is shown along the left side, with an “up” direction marker indicating the route to the next level.
- **Bedroom arrangement:** Three bedrooms are labelled. Two are 12' × 12' and one is 11' × 12', giving the labelled bedrooms areas of 144, 144, and 132 sq ft respectively.
- **Kitchen zone:** The open kitchen is placed beside the 8' × 7' bathroom and opens toward the main living area. The drawing depicts a counter/sink and a cooking area; no kitchen dimensions are stated.
- **Bathrooms:** Two bathrooms are identified, measuring 7' × 5' and 8' × 7'. The plan also shows sanitary fixtures in each room.
- **Openings and furniture:** Door swings, windows/openings, beds, seating, kitchen fixtures, and decorative plants are represented graphically. Furniture placement indicates possible use, not a fixed furnishing specification.

04 | AREA AND DRAWING LIMITATIONS

All dimensions and room names above are transcribed from the supplied floor plan. Areas are simple length × width calculations from those labels and are approximate. The source drawing does not state a scale, overall external dimensions, wall specifications, structural details, north direction, or the dimensions of the open kitchen and stair. Therefore, this document is a descriptive plan record—not a construction, structural, or approval drawing. Verify dimensions on site and with the original CAD file before execution.

Drawing basis: “Floorplan 03-Model.pdf” supplied by the user (1 page). No unstated dimensions have been assumed.
